

# The new SAILOR 4300 L-band.

Built for Iridium Certus<sup>SM</sup>.

The new SAILOR 4300 L-band leverages decades of maritime L-band expertise to give you unmatched reliability and low lifecycle costs. It is the perfect choice as a standalone terminal or as a backup solution for VSAT. Here are just a few of the benefits you can expect as the Iridium NEXT constellation reaches full maturity in 2018.

**COBHAM**

**\$3 billion**

New USD\$3 billion Iridium NEXT satellite constellation

**66** 

66 cross-linked Low-Earth Orbit satellites

Pole-to-pole global coverage

1.4Mb/s

Highest L-band throughput (1.4Mb/s in future products)

Low data rates

Trusted provider for maritime satellite communications

[sync.cobham.com/satcom/SAILOR-4300](http://sync.cobham.com/satcom/SAILOR-4300)

Built in-house and sea-tested for SAILOR quality

The first of our new Iridium L-band antennas

Low cost, next generation hardware

Multiple simultaneous satellite tracking

Single cable above/below deck

**704↓**  
**176↑**

704/176 Kbps and 3 voice lines
